

I've got something to talk about  
And I can't believe that it's true  
Everything around me is going to hell and we are too

Can somebody save my soul  
Give me a little bit of rock and roll  
Somebody can you please help me

What you've got to say to me  
'cause you know everything I believe  
What you've got to say to me  
Why don't you practice what you preach

How can you make me believe in you  
When you've got a lot a learning to do  
Make me believe in you  
'cause you got some nerve you two

You only know what you wanna know  
You only see what you wanna see  
And how far will you let it go  
Before it all comes crashing

Can somebody save my soul  
Give me a little bit of rock and roll  
Somebody can you please help me

What you've got to say to me  
'cause you know everything I believe  
What you've got to say to me  
Why don't you practice what you preach

How can you make me believe in you  
When you've got a lot a learning to do  
Make me believe in you  
'cause you got some nerve you two

Well don't you dare tell me  
That we will I'll be somebody  
'cause if you don't have what it takes  
To fix yourself and make a change

Change

What you've got to say to me  
'cause you know everything I believe  
What you've got to say to me  
Why don't you practice what you preach  
What you've got to say to me  
Why don't you practice what you preach

Hey!

How can you make me believe in you  
When you've got a lot a learning to do  
Make me believe in you  
'cause you got some nerve you do
