

# On the Campaign Trail

The Automatic

One place for all this distance  
We've got so displaced  
The life that you've always wanted  
A thousand miles away  
Like nomads, like an architect  
Like moving in one place  
We can live forever  
We can fade away

Borrowed time and missing faces  
No home in a million places  
I don't want a change of pace  
I can't do anything else

Borrowed time and missing faces  
No home in a million places  
I don't want a change of pace  
I can't do anything else

Now I have your attention  
It's just a matter of time  
'Til you question what I'm saying  
Make me justify  
Every word in every line  
That does not seem to fit  
But the meaning's not so important  
As long as you mean it

Borrowed time and missing faces  
No home in a million places  
I don't want a change of pace  
I can't do anything else

Borrowed time and missing faces  
No home in a million places  
I don't want a change of pace  
I can't do anything else

The life that  
I wanted  
Is frozen  
In motion  
(x 2)

Borrowed time and missing faces  
No home in a million places  
I don't want a change of pace  
I can't do anything else (x 2)
