

I See You There

The Babys

Take a breath, close your eyes
Let's go some place only we can find
No one else just you and me
This is where I always wanna be

In your arms
Falling all over

Life feels busy looking over my shoulder
Stealing every minute it can
But I get back those moments as soon as you're closer
Every time, every time I see you there

Rolling on, day to day
No one love this head in my way
Home again threw the door
Happy to be where I was before

That's in your arms
Falling all over

Life feels busy looking over my shoulder
Stealing every minute it can
But I get back those moments as soon as you're closer
Every time, every time I see you there

We all amount to nothing
When love is over, the dream is over
Now when I've got you under my skin
I never walk alone

Here we are this love we're in
Feeling closer than we've ever been
Safe again, it speaks to me
This is where I always wanna be

Still in your arms
I'm falling all over

Life feels busy looking over my shoulder
Stealing every minute it can
But I get back those moments as soon as you're closer
Every time, every time I see you there

Life feels busy looking over my shoulder
Stealing every minute it can
But I get back those moments as soon as you're closer
Every time, every time I see you there
