

# Radio at Night

The Badlees

Here we are tonight  
Back where we came to be  
The summer's evening frames  
The moon in infinity

You and me so uninspired  
Feeling that we've lost our fire  
But tonight we're singing memories

And reconnecting souls  
There's diamonds in that coal  
Life will take its toll  
But songs of youth in summer feel so right...

On the radio  
On the radio  
On the radio at night

We're lifetime passengers  
Laying on my hood again  
You the stars and me  
Maybe this could be a trend

One more song still so true  
To touch the core of me and you  
Time can be the cruelest on the heart

Of every passenger  
Hardened and unsure  
If love really can endure  
But maybe we can the find a cure in sight...

On the radio  
On the radio  
On the radio at night

There was a time  
We couldn't find the rhyme  
But now here we are  
Together in a hundred ways

Here we are tonight  
Back where we came to be  
The summer's evening frames  
All of our memories

On the radio  
On the radio  
On the radio at night
