

The Night

The Bates

The city lights are cold with me
I see thousands of colours around me
And I know I will find you tonight
I find you in the night
I find you in the night

I was sleepin' all day through
But now all my senses are awake
And I know I got a chance
Baby it's the night
Maybe it's the night
Yeah
I get it in the night
I get it in the night
Get it right there

A little breeze is touchin' my skin
And the air smells so sweet just like candy
And I feel I will get what I want
I get it in the night (12x)
