

Your Light

The Big Moon

Don't don't don't don't say another sorry today
One more time is more than you mean anyway
Lately I've been fine, floating away
Got so out of touch and started to levitate

Now we just hang around like a haircut growing out
This planet never needed gravity to drag you down

But days like this (days like this)
I forget (I forget)
My darkness (my darkness)
And remember your light

And remember your light

Don't don't don't don't blame another night on the moon
Suntime's faith just sings to a different tune
Why do you have to take it out so hard on yourself
We were promised the world, so was everyone else

So maybe it's an end 'cause this don't feel like a stop
But every generation probably thought they were the last

And days like this (days like this)
I forget (I forget)
My darkness (my darkness)
And remember your light

And remember your light
Oh oh ohhh

(Do I wanna lose myself
Wanna lose myself
Wanna lose myself)

(Do I wanna lose myself
Wanna lose myself
Wanna lose myself)

I wanna speak but I'm wondering how
And I wonder since when was my voice a foreign object in my mouth
But what you're doing for me
I wish I could do, I could do it for you

Yeah what you're doing for me
I wish I could do
I could do it for you (I could do it for you)

'Cause days like this (days like this)
I forget (I forget)
All of this (all of this)
And remember your light

And remember your light

And remember your light
(I don't wanna lose myself)

Wanna lose myself
Wanna lose myself)

And remember your light
(I don't wanna lose myself
Wanna lose myself
Wanna lose myself)

And remember your light
