The Birthday Massacre

Science

Make you up, take you out Play it up to bring you down Take the time to make this last

Spin the wheel, watch it crash Turn the dress to broken glass Strike a pose and hold the flash

I'm not the only one who's bleeding Before the past is done repeating Gets underneath my skin, it won't die This time if I can't win

Then I won't try to carry on I'll play it satirical Tonight won't be so long I'll pray for a miracle

Wake you up, pull you out Talk you up to calm you down Turn it up and scream and shout

Make you tired, wear you out Shut you up and turn you off Clean you up and take you home

I'm not the only one who's bleeding Before the past is done repeating Gets underneath my skin, it won't die This time if I can't win

Then I won't try to carry on I'll play it satirical Tonight won't be so long I'll pray for a miracle
