

To Bring You Back

The Black Heart Procession

Every night it's the same,
I wait for you,
Daylight takes you away,
Night time brings you back,
It's been so long,
The days last so long,
When I wake,
The light seeps in and i know i have no defense,
Something took you away but the night time will bring you back,
It's been so long,
The days last so long,
In the night i wait for you to bring me back,
In the night i wait for you and bring you back,
When i can bring you back.
