

# I've Got Better Things To Do Tonight Than Die

The Blackout

We can see through you  
But we don't have x-ray eyes  
We can see the truth  
And set our sights upon the prize  
Say what you will  
We are never gonna crack  
There's a time to kill  
And we all know that this is it

So bang your head and close your eyes  
We are about to take our lives

We are the dynamite  
Demolition is our religion, so light the fuse  
We are the dynamite  
Demolition is our religion, so light the fuse

Don't try to run  
Detonation is underway  
Your ends begun  
Your black skies have turned to grey  
The sky will fall  
Down on everything you know  
You can't ask more  
You face a mother without hope

So bang your head and close your eyes  
We are about to take our lives

We are the dynamite  
Demolition is our religion, so light the fuse  
We are the dynamite  
Demolition is our religion, so light the fuse

We are, we are the dynamite  
We are, we are the dynamite  
We are, we are the dynamite  
We are, we are the dynamite

We are the dynamite  
Demolition is our religion, so light the fuse

We are the dynamite  
Demolition is our religion, so light the fuse  
We are the dynamite  
Demolition is our religion, so light the fuse

So light the fuse  
Demolition is our religion, so light the fuse  
Light the fuse  
Demolition is our religion, so light the fuse
