

# I Thought You Liked Me

The Blue Van

Ripped and bruised Chewed words to pieces The deepest cut Drain  
s like diseases

It's an infection When your whole world falls down

Every time your near I thought you liked me And my head is clear  
I thought you liked me And I can't let go I thought you liked  
me 'Cause it's all I know I thought you liked me

When all is said I guess the conclusion Is that we try our best  
But we're only human

It's the affection That is our engine

Every time your near I thought you liked me And my head is clear  
I thought you liked me And I can't let go I thought you liked  
me 'Cause it's all I know I thought you liked me
