

All the way  
All the way  
All the way  
All the way

A spark ignites, the engine fires  
A light that burned couldn't be denied  
We didn't stop to wonder why  
We got on board to take that ride

All the way, we're united  
All the way, you and I  
All the way, never divided  
All the way!

A new road becoming clear  
Everything else disappears  
Looking out beyond the wheel  
We can see what's truly real

All the way, we're united  
All the way, you and I  
All the way, never divided  
All the way!

You a want a fire? Be the spark  
Burn so bright, destroy the dark  
The energy when it's you and me  
It's only right in unity

All the way, we're united  
All the way, and we rise  
All the way, stand together  
All the way! Until we die

All the way, we're united  
All the way, you and I  
All the way, never divided  
All... the fuckin' way!
