

I Just Realized

The Brand New Heavies

I just realized something
Deep in my mind something
I just realized we could be free
Im being attacked by something
I just realized we could be free

The sun is shining bright today
So much brighter than before yeah yeah
I guess today could be the day
If you and I greet it slowly

I just realized something
Deep in my mind something
I just realized we could be free (something to see)
Right before my eyes something
Im being attacked by something
I just realized we could be free (we've got to see it)

La~

Its time for us to get it done
To finish what we have begun
If many people live as one
Maybe we'll get it done

I just realized something (I just realized)
Deep in my mind something
I just realized we could be free (Oh we can be free)
Right before my eyes something
Im being attacked by something
I just realized we could be free (we've got to see it)

La~

Oh, I just realized something
Deep in my mind something
I just realized we could be free (something to see)
Right before my eyes something
Im being attacked by something
I just realized we could be free (we've got to se it)

La~
