

## High Tide

The Bronx

Rescue me again, I'm still hanging on by a thread  
Rescue me again, baby please come back to bed  
You're keeping my hope alive

Let's not pretend, we live in a perfect world  
I'm a sick man, and you're just a medicine girl  
I know you know we're both better off on our own  
We're in over our heads  
But you brought me back from the dead

Rescue me again, I'm still hanging on by a thread  
Rescue me again, baby please come back to bed  
You're keeping my hope alive

You stayed in my eyes, lo how you stayed in my bones  
Once is never enough don't ever leave me alone

I was caught in the clouds spiraling down, twisted and tangled  
and lost  
You bring me back to earth with everything that you do

I know you know we're both better off on our own  
We're in over our heads, but you brought me back from the dead

Rescue me again, I'm still hanging on by a thread  
Rescue me again, baby please come back to bed

Rescue me again, and stop me from falling apart  
Rescue me again, with an adrenaline shot to my heart  
You're keeping my hope alive
