Disconnect

The Browning

You live in a fabricated world

When did reality end and cyberspace become the world we live in ?
Look up, look me in the eyes! You sheep, why are you so blind?

Fake friends! Fake life! You live a lie!

A whole generation disconnected, minds infected, souls rejected .
Everybody losing track of what respect is.
Overly obsessed with image, no perspective.
A whole room full of white screens and black souls.
Like cattle staring down into a black hole.
Watch em'' all, take a selfie like a sad clone.
Egos dance in the void of a chat room.
I don't want your fucking friend request
I'd rather put this knife into your neck, you fucking bitch.
Ignorance - I don't want your fucking friend request!
I'd rather put this knife into your neck, you fucking bitch!

This is a social disorder, you lost respect for humanity!
Cloaked by a virtual world, you lost touch with reality!

I fear, for the future of mankind!
Disconnect me from this world!
Disconnect me from this world!

So many follow you, but you are the sheep.
Nobody really cares when you speak.
They look right past you, lost in the code.
Empty attention will leave you cold.

Fake friends! Fake life! You live a lie!
Disconnect me from this world!
Disconnect me from this world!
