Eyes Of Fire

The Bruisers

In days gone by we chose our side
Showed them we weren't afraid to step over the line
Standing fall we would look you in the eye
Cause what we hold true you could never deny
You don't understand what we chose to condemn
You're the one who has made it us against them
Our hearts turn black and our blood runs cold
When we see our country being bought and sold

With eyes of fire we see things today
You could never change us cause it's our way
With eyes of fire we see things today
You could never stop us it's too late

Long ago we learned it's our fight
To try to bring out what they hide from our sight
To show them they have not won our hearts and minds
With their pledges, promises, and campaign lies
With eyes of fire we see what we see
For this country, what it is, and should be
Where an honest man can get ahead and not just by
And say he loves his country with his head held high
