

## See It Through

The Cactus Blossoms

Wait 'til it's over  
Wait 'til the end  
Stay with me lover  
Stay with me friend

Listen to the music  
Let me know you care  
Walking in after midnight  
Echoes in the air

I know that you really wanna hang around  
I know that you really wanna hang around  
I know that you really wanna see it through  
I know that you really wanna see it through

I know that you really wanna hang around  
I know that you really wanna hang around  
I know that you really wanna see it through  
I know that you really wanna see it through

I know that you really wanna see it through  
I know that you really wanna see it through  
I know that you really wanna see it through  
I know that you really wanna see it through
