When I Fall In Love

The Cassandra Complex

When I fall in love... When I fall in love It will be forever Or at least for a day If you will only say That's enough for you To reach across the wires, hold my hand And understand That's enough for you

That's enough for me That's enough for me That's enough for me That's enough for me

I've always been romantic Though my friends all laugh And if you ask me for my autograph That's enough for me So won't you give me a chance Just one chance That's enough for me That's enough for me
