

Dreams

The Cats

Wish I was upon a star Far away up in the sky Beyond the reach
of human mind That`s where I like to be with you

Wish I was in the sea Down the bottom, you and me See the colour
of the water That`s where I would like to be with you

In the sky or in the sea I don`t care what it would be If only
there were you and I We would live and never die You and me I w
ish that we had wings to fly Like the birds up in the sky And t
hen we would fly away From the dark into the day You and me

Wish I was gently floating Carried by the lazy river Feel the m
agic of the silence That`s where I would like to be with you

I wish it was like a dream Fairytale would come to be Reality
for you and me I want to thank you for being you My love

In the sky or in the sea I don`t care what it would be If only
there were you and I We would live and never die You and me I w
ish that we had wings to fly Like the birds up in the sky And t
hen we would fly away From the dark into the day You and me
