

# There Will Be Chances

The Charlatans

Ooh  
Come with me  
To the fields  
Want to share  
(Always a part of me)

You  
Take me to  
Places new  
Glad you care

Do you feel it too?  
When we're there  
If you don't  
(Open your heart and see)

Then  
As of now  
We'll be free  
To be us

If you stare into space  
You might not find answers  
But if you look to find a trace  
There will be chances

I've always felt  
In our world  
There would be  
(Someone for everyone)

So  
When it comes  
Be assured  
But not too cool

Look at the stars  
They don't know  
Where to start  
(But they make up the universe)

So  
This is love  
That we found  
Against the odds

If you stare into space  
You might not find answers  
But if you look to find a trace  
There will be chances  
If you stare into space  
You might not find answers  
But if you look to find a trace  
There will be chances

I laughed when I  
Thought about the past

A place I loved but can't go back  
The present's where it's at  
Memories disintegrate  
The best of them remain

If you stare into space  
You might not find answers  
But if you look to find a trace  
There will be chances  
If you stare into space  
You might not find answers  
But if you look to find a trace  
There will be chances  
If you stare into space  
You might not find answers  
But if you look to find a trace  
There will be chances
