Tooth And Nail

The Chisel

Your laws mean nothing to us
We're here for impact, no mess, no fuss
Your jewels fade, your gold turns to rust

So let it be known that we are here
The sounds of malice is in your ear
Don't bow to no man, no priest and no crown

One the streets again
And I'll fight 'til there's nothing left
Tooth and nail, we can't fail
So don't say you haven't been warned

So let it be known that we are here
Running amok and spreading fear
With an axe to grind and nothing left to lose

So you better watch out when we're in your town
There ain't no way that we're going down
We're the chisel boys, and this ain't nothing new

On the streets again
And I'll fight 'til there's nothing left
Tooth and nail, we can't fail
So don't say you haven't been warned
