

# Cross That River

## The Choir

The water is rising The current is hypnotizing You're not the only one We all feel trepidation

Cross that river One rock at a time You can cross that river You can cross that river Never mind the rapid tide You can cross that river

The time has come for sure This is your great adventure The eagle is soaring high Fix your mind on the other side

Cross that river One rock at a time You can cross that river You can cross that river Never mind the rapid tide You can cross that river

But you're not gonna make it if you don't take a chance And there's somebody on the shore holding out a branch

You've gotta believe it When the light comes down receive it Take my hand, pray for help And be true to your own self

Cross that river One rock at a time You can cross that river You can cross that river Never mind the rapid tide You can cross that river

But you're not gonna make it if you don't take a chance And there's somebody on the shore holding out a branch

When you make that leap of faith beware Of the slippery moss You'll be amazed before you're halfway there Come on, move steady across

Cross that river One rock at a time You can cross that river You can cross that river Never mind the rapid tide You can cross that river

When you make that leap of faith beware Of the slippery moss You'll be amazed before you're halfway there Come on, move steady across You've already been baptized by fire You've been born again Take to the water, take to the sky Like a flying amphibian

Cross that river One rock at a time You can cross that river You can cross that river Never mind the rapid tide You can cross that river
