

Globe Spinning

The Church

Long and lonely
Long and lonely song
Only longed twice in a row
When you fall in a group
Then out you go

(Saved the last star, falling far away
Saved the last star, falling far away
Saved the last star, falling far away)

It's almost never tomorrow
Time has left no footprint in these sands
No hint of passing in these lands
When there's no light to follow

Long and lonely
Long and lonely song
Only longed twice in a row
When you fall in a group
Then out you go

The power to stop is beholding
You cowl but I think withholding from love
After the pain has dropped
After the rain

(Saved the last star, falling far away
Saved the last star, falling far away
Saved the last star, falling far away
Saved the last star, falling far away)

We're spending more than we borrow
Money has no meaning in the hand
It's just columns buried in the ground
Scheme of things so heavily hollow

Long and lonely
Long and lonely song
Only longed twice in a row
When you fall in a group
Then out you go

The coward has charges misleading
He barges in disbelieving no more
Back but no emptier
Covered in dirt

Out you go, out you go, out you go
Falling far away
Out you go, out you go, out you go
Falling far away
Falling far away
