

Let Us Go

The Church

See the baby walking through the sleet
A monster moves in the violent sea
Go, I let that go

The tightrope breaks, the magic's gone
Nothing matters, we're falling stars
Evaporate, dust in space
The music fades, no accolades
No, that's a snow

If you touch us we'll disappear
If you're waiting we're never here
If you listen, please just let us know
Please let us go

If you touch us we disappear
If you're waiting we're never here
Oh, let it grow

See a baby walking through the sleet
A monster moves in the violent sea
She's the one with the wild white feet
She's the one with the moon and star
No, I let that go

The tightrope breaks, the magic's gone
Nothing matters, we're falling stars
Evaluate, does this taste so good
No, please, let us go
Let us go
Let us go
Let us go
Let us go
Let us go
Let us go
Let us go (Please let us go) (No please don't let us go)
Let us go (Please) (No please don't let us go)
Let us go
