

Saturation

The Church

Cast adrift
On these solar seas
The humble servant
Of your majesties

In the orbits tremor
The slightest string is pulled
Corral the villains
Where are the fools

And it's all in a day, a generation
When you get to the saturation
It's all down, down, down, down
If only
If only I could solve it for you
If only
If only I could dissolve it for you

You cut my hand
On a chandelier
You know what I was searchin'
For a little good cheer

In the planes above us
The slightest prick is felt
And we break down
And we just melt

And it's all in a spell incantation
When you get into penetration
It's all down, down, down, down
If only
If only I could solve it for you
If only
If only I could dissolve it for you

I'm set apart
On the broken reef
I'm as helpless
As the smallest leaf

And in the lethal jungle
The slightest sound is heard
Who are the humans?
Where are the birds?

And it's all in a miscreation
And you get to the explanation
It's all down, down, down, down
If only
If only I could solve it for you
If only
If only I could dissolve it for you
Alright!
