The Myths You Made

The Church

When the failing light
With the feeling's gone (feeling's gone)
I'll ask you twice tonight
To make sure I'm wrong (sure I'm)
Still you looked to fold in two behind the shade
Are you lying there in wait

Here's all the love you lost
The myths you made
Here's all the things you didn't say

All the days and hours
Pass by slow (pass by slow)
With the crowded tears
And the lights on low (lights on)
If lips mean some beauty freeze again
Ripple up in flames

Here's all the time you took
The myths you made

Here's all the things you didn't say
The myths you made
The things you didn't say

You gotta get a story
Where there's love (where there's love)
With my hand on the bible
And the fable done (fable)
Still 'til all the little details are exposed
Here comes the final blow

Here's all the love you lost
The myths you made
Here's all the things you didn't say
Here's all the time you took
The myths you made
Here's all the things you didn't say
