

# Satellites

## The Cinema

Ok, you fell asleep in the pouring rain  
So I gathered up your lips to say  
You got it good kid, got that movement  
Well don't throw it away  
Well I once was a mess too  
But she saw through, and I know you  
Got this in your blood, dear  
For years and years and years

Killin' time in the best ways  
So c'mon and join me  
Saturday was never the same without your name

The satelllites were glowing  
At least we were hoping  
Yeah the satelllites are glowing  
Well just for the moment  
Yeah you stole it

Saw your face, and the words just came  
Yeah, I blame that bottle  
I blame this bar stool  
I think I got what you need from me  
So let's take it week by week by week  
Well I once was a mess too  
But she saw through, and I know you  
You got this in your blood, dear  
For years and years  
Killin' time in the best ways  
So c'mon and join me  
Saturday was never the same without your name

The satelllites were glowing  
At least we were hoping  
Yeah the satelllites are glowing  
Well just for the moment  
Yeah you stole it

I think I'd make it out if I was older so I told her  
One more for the road, one more yeah  
But she knows me better  
I think we'll make it out when we get older but I know her  
Making bets, making bets in her head, poker  
She must be a model  
Now I think we're having fun, bottles  
Got all the time in the world  
Yeah so wipe that look off your face girl

The satelllites were glowing  
Killin' time in the best ways  
So c'mon and join me  
Saturday was never the same without your name

The satelllites were glowing  
At least we were hoping  
Yeah the satelllites are glowing  
Well just for the moment

Yeah you stole it

(I think we'll make it out when we get older)  
The satellites were glowing  
(Make a bet, make a bet)  
Well just for the moment  
Yeah, you stole it
