

Dance On the Bar

The Clarks

I used to jump in the car
I'd grab my weekly pay
And from the jar
Head for the Milky Way
I used to burn till the dawn
And then all along
Those days are gone

You used to shine like the sun
You made up all the rules
Take the smallest men
And turn them into fools
You could stop our cars

But light from the stars
The noise and guitars
Dance on the bar
Be who you are
Own every scar
Go ahead and dance on the bar

You need somebody to hold you when you dream
Somebody to silence all your screams
Whenever you're down here on your knees
Can somebody wake me, take me please

You're gonna live in the light
Without a single care
Gonna run through the hills
Wind blowing through your hair
Said I'm on a good cause

And light from the stars
The noise and guitars
Dance on the bar
Be who you are
Own every scar
Go ahead and dance on the bar

You need somebody to hold you when you dream
Somebody to silence all your screams
Whenever you're down here on your knees
Can somebody wake me, take me please

The sea and the climb
The here's the time
It fades away
Get in, get out
Give love is all I gotta say

Somebody to love you
Somebody to hold you when you dream
Somebody to want you
Somebody to silence all your screams
Somebody to love you
Somebody to hold you when you dream
Somebody to want you

Somebody to silence all your screams

Somebody to love you

Somebody to hold you when you dream

Somebody to want you

Somebody to silence all your screams

Somebody to love you

Somebody to hold you when you dream

Somebody to want you

Somebody to wake me, take me please

Wake me, take me please

Wake me, take me please
