

## Cold October

The Colourist

It was a cold October when we found each other's hearts  
I took your hand and held it, we watched the stars in my car

The thought of you, the thought of us, the thought that I could  
be enough  
You said we would always make it through, you said we would alw  
ays make it through  
The thought of you, the thought of us, the thought that I could  
be enough  
You said we would always make it through, you said we would alw  
ays make it through

We took the drives through the night to get away from the talki  
ng crowd  
We parked along the hillside, that's where we concealed ourselv  
es within

The thought of you, the thought of us, the thought that I could  
be enough  
You said we would always make it through, you said we would alw  
ays make it through  
The thought of you, the thought of us, the thought that I could  
be enough  
You said we would always make it through, you said we would alw  
ays make it through
