

Set It Right

The Colourist

Stand up, you've got this chance to run
One shot, show those kids that they were wrong
Give up the fears that you keep inside
You set it right, you set it right there and all

Don't you forget, now, that you're strong
Those dreams don't sit right bottled up, bottled up
And so you go out, and hear in your head
"It's all right, it's all right"
Soar up and hear them go "whoa"
Ooh, set it right, set it right
Ooh, set it right, set it right

Stand up and hold your hands out wide
Soak up the courage that you'll need tonight
Breathe in and kiss them all goodbye
You set it right, you set it right there and all

Don't you forget, now, that you're strong
Those dreams don't sit right bottled up, bottled up
And so you go out, and hear in your head
"It's all right, it's all right"
Soar up and hear them go "whoa"
Ooh, set it right, set it right
Ooh, set it right, set it right

And when you're feeling small
You know your heart is true
And it's enough to lift you
And when you think you'll fall
You feel your weightless shoes
The ground will rise to meet you

And when you're feeling small
You know your heart is true
And it's enough to lift you
And when you think you'll fall
You feel your weightless shoes
The ground will rise to meet you

Don't you forget, now, that you're strong
Those dreams don't sit right bottled up, bottled up
And so you go out, and hear in your head
"It's all right, it's all right"
Soar up and hear them go "whoa"
Ooh, set it right, set it right
Ooh, set it right, set it right
