

Are you still mad?
Let's dance around that,
Keep it breezy
Well, I'm so glad
It's not a fake laugh
It's just easy

And who wants to fall in love?
All the cynics stand up
And we'll both lie down right here on this floor
It never seems to be enough
You couldn't make this shit up
Looks like it's one of those things that just can't be ignored

So take me to your favourite place nearby
I've never seen LA before at night from this high,
But careful 'cause we're hurting from past mistakes
But I think we're almost certain yeah, we're gonna be okay

And if it's too soon
Then we're both screwed
Just on purpose
And it's a big if
Just like my card tricks
They're not perfect

And who wants to fall in love?
All the cynics stand up
And we'll both lie down right here on this floor
It never seems to be enough
You couldn't make this shit up
Looks like it's one of those things that just can't be ignored

So take me to your favourite place nearby
I've never seen LA before at night from this high
But careful 'cause we're hurting from past mistakes
I think we're almost certain yeah, we're gonna be okay

And I nearly just said something there
It might be too soon
And look at us, we're nervous now
But it feels kinda cool
Don't talk about the future or past mistakes
We're careful but we're hoping yeah, we're gonna be okay
It's gonna be okay

Did you find it all
A little too hard?
It's gonna be okay
