

We Couldn't Fake It

The Coronas

Covered in water they left me for dead
She's somebody's daughter, somebody's friend
Would you notice me? Would you notice me?
And there's screaming, but you're already leaving
And I'm mad at myself
Yeah I almost believe them

Don't let me waste your time
Cause we heard it all before
And we never like that, leave it alone
We don't need to change your minds
Cause we never changed at all
Yeah we couldn't fake that, no

And now it looks over before it even begins
I throw you over my shoulder yeah we go again
Cause we're focusing, yeah we're focusing
And I'm screaming cause you're already leaving
I'm just mad at myself
Yeah I almost believe them

Don't let me waste your time
Cause we heard it all before

And we never like that, leave it alone
We don't need to change your minds
Cause we never changed at all
Yeah we couldn't fake that
We couldn't fake that
We couldn't fake that

So let them all ignore us
I feel it, don't you feel it
We know what's more important
Believe it when you see it
And I take something from it even if you gotta take some of the blame
Find something that you know you can't replace

Don't let me waste your time
Cause we heard it all before
And we never like that, leave it alone
We don't need to change your minds
Cause we never changed at all
Yeah we couldn't fake that
We couldn't fake that
We couldn't fake that
We couldn't fake that
We couldn't fake that
