

Rhythm of the World

The Cowsills

I pay attention to the light outside
How it moves through the sky
It's my info online
I hear the trees with the window and through
And the signal is clear
Telling me what to do

I can read the writing in the sky

You're having way too much fun to slow down
Come and drink from my cup
Turns a love to go around
But please remember there's this place where we live
It can't take too much more
Something big's gotta give

There's a billion stars up in the sky
Telling all the secrets to deny

(Feel) I can feel the rhythm of the world running
(Feel the rhythm of the world)
I can hear the rhythm of the world running
(Hear the rhythm of the world)
Like something is coming

Hey now, hey now, hey now
Now now now now
Hey now, hey now, hey now
In the sky

We all agree tonight
Everyone of us inside
And we could just follow the line
We could through the night
(The sky, the sky, the sky)
Oh yeah

So pay attention to the light outside
How it moves through the sky
Let it serve to remind
That there's a spider where we all get to live
It can't take too much more
Something big's gotta give

There's a billion stars up in the sky
Telling all the secrets to deny, yeah

And feel the rhythm of the world running
(Feel the rhythm of the world)
I can hear the rhythm of the world running
(Hear the rhythm of the world)
Like something is coming
Like something is coming
Like something is coming
Like something is coming
