

Deer In The Headlights

The Dead Rabbits

You never believed or had faith in me
You always just tore me down
Now that I've survived you look so surprised
Like a deer in the headlights

You are the fire starter
You are the fire starter
You are the fire starter
You are the fire

I'm a .. of a failure
I never thought that you would be the one to feel like this way
I'm here to prove you're wrong
I have a million dozen reasons why you should...
All your words.. name we heard
.. yelling why you..
Now you're paying for hell
You're going to get what you deserve

You never believed or had faith in me
You always just tore me down
And wished that I would die, but I'm still alive
You never believed or had faith in me
You always just tore me down
Now that I've survived you look so surprised
Like a deer in the headlights

I can't believe I ever I ever trusted you
No love is this ...
Always because ...
..you have never been
... just a fucking bitch
...
Now you're paying for hell
You're going to get what you deserve

You never believed or had faith in me
You always just tore me down
And wished that I would die, but I'm still alive
You never believed or had faith in me
You always just tore me down
Now that I've survived you look so surprised
Like a deer in the headlights

You've lost the inner person
That always had your back
But all you're talking to is ...
All I can do is lost
Are you just fucking blind?
I guess that wasn't me
Just wish I had the time
You stole away from me

You never believed or had faith in me
You always just tore me down
And wished that I would die
I'm still alive

You never believed or had faith in me
You always just tore me down
Now that I've survived you look so surprised
Like a deer in the headlights
