The Dead Rabbits

Burn at the fire

I've got a light in your web of lies
Did you even notice that I was on fire?
Let me crash and burn
And now the tables turned

The past is gone, it's left a side of me that's already died
I can't believe how much I miss you, though you're right by my side
The only option to finding a sound of love
Remember when I held a smile when you talked to me?
I can't believe how much I wanted you to set me free
The only option is ending what once was love

"I'm still alive", said the spark to the fly
The devil incarnate with an angel smile
I was once alright
You were never mine

I can't hope it was worth this
I can't hope it was worth this

The past is gone, it's left a side of me that's already dead
I can't believe how much I miss you, though you're right by my side
The only option to finding a sound of love
Remember when I held a smile when you talked to me?
I can't believe how much I wanted you to set me free
The only option is ending what once was love

And you, you can't believe

Feels like you don't have to answer me
But I'll fucking

The past is gone, it's left a side of me that's already dead
I can't believe how much I miss you, though you're right by my side
The only option to finding a sound of love
Remember when I held a smile when you talked to me?
I can't believe how much I wanted you to set me free
The only option is ending what once was love
