

# Don't Lose The Faith

The Dears

Feeling self-conscious  
It's the only way to save us  
And forget about your awful past  
Do it now or we'll never last

Noble and yet famous  
Will they ever have that on us?  
For we've got the anti-social plague  
We want friends but we'll never beg

And you'd think they would have  
Called out our name  
But the voices all sound the same  
They do, yeah

(Don't you lose the faith)  
How many days are left to live  
When we've given all we can give

(Don't you lose the faith)  
We're tired of being held in this place  
When your half of the world away

(Don't you lose the faith)  
How many days are left to live  
When we've given all we can give

(Don't you lose the faith)  
We're tired of being held in this place  
When your half of the world away

We're tired of being held in this place  
When your half of the world away

Don't you lose the the faith  
Don't you lose the the faith  
Don't you lose the the faith  
Don't you lose the the faith
