

Stop and Look (And You Have Found Love)

The Delfonics

Stop, and look, and you have found love
Stop, and look, and you have found love
You've been looking for love
And you got lost on the way
What if I told you I am the one for you?
Stop, and look, and you have found love
Stop, and look, and you have found love
Stop, and look, and you have found love
Stop, and look, and you have found love
Now that you found your other half
We've got a love that's gonna last
Nature has opened up the door
Now we don't have to look no more
You've been looking for love
And got lost on the way
But what if I told you I'm the one for you
What you're looking for
You're in love with me and
Stop, and look, and you have found love
Stop, and look, and you have found love
Stop, and look, and you have found love
