

## Asteroid

The Devil Wears Prada

Racing toward us  
Something like never before  
Inevitable impact  
Undeniable encounter  
Man studied trajectory  
Our best scientists all together  
Racing towards us  
Breaking through the atmosphere  
Flames streak through the night sky  
With imminence is our destruction  
Rapidity and certain doom  
What's to say now? What's to ask?  
I can't believe we never thought  
We never thought it'd end like this  
While we all live with hate towards our neighbors  
Without favor

Think of best friends  
Think of strangers  
Think of lovers  
Think of foes  
Think of children  
Think of family

Keep in mind that nothing stays  
Say goodbye one last time as the earth will be no more  
All aflame and destroyed  
It's funny how we once fought  
It's funny how we didn't care  
Consider what we could have been  
Say goodbye one last time  
It's getting closer now  
Say goodbye one last time  
It's closer now
