

## Cure Me

### The Devil Wears Prada

I've been living at the bottom without hope for me to hold  
No exit to nirvana, gotta find a different road

So fractured and faded  
But that's how we made it

I'll take a dose of clarity, you can have your make believe  
Been blinded by a remedy, but there's no cure for me

All this makeshift medication hides the cracks within the walls  
The world's not as pretty when you have to see it all

So fractured and faded  
But that's how we made it

I'll take a dose of clarity, you can have your make believe  
Been blinded by a remedy, but there's no cure for me  
But there's no cure for me  
No cure for me

So fractured and faded  
But that's how we made it

So fractured and faded  
This world keeps pulling me apart  
But that's how we made it  
Somehow I made it this far

I'll take a dose of clarity, you can have your make believe  
You can have your make believe  
Been blinded by a remedy, but there's no cure for me

All this makeshift medication hides the cracks within the walls  
The world's not as pretty when you have to see it all  
There's no cure for me
