

Sparks

The Dø

It glows at night
It's just a start
I'm not surprised
It shook us up

We like to keep
Some places wild
Like battlefields
Where no one fights

The road that we share
The air that we breathe
The treasures we hide
Here and there

The ashes of love
The signals of hate
The planes and the crumbling sky

And if someone calls or shows up at the door
No one will be there to answer anymore
We have it on tape now

It glows at night
It's just a start
I'm not surprised
It shook us up

We like to keep
Some places wild
Like battlefields
Where no one fights

A planet was born
A building decayed
We lifted a ton
Overhead

What everyone knows
But never admits
We'll play by the rules
This time

But if someone calls or shows up at the door
No one will be there to answer anymore
We have it on tape now

It glows at night
It's just a start
I'm not surprised
It shook us up

We like to keep
Some places wild
Like battlefields
Where no one fights

It glows at night
It's just a start
We're holding on
We're staying strong

We won't collide
We won't divide
We like to keep
Some places wild
