

## Is This It

The Dodos

Unsettled air, forgotten dreams  
I fear what's coming after this  
What chance we have against the grain  
No feeling left to conjure up

We find ourselves in conflict  
I fought the answer in between  
You needed someone else's  
Accept what's there in front of me

Is this it? What is left?  
God has split us in half  
Is this it? Seconds left  
Will it fit? Could it fail?  
Is this it?

Waves brought you in, was I awake?  
Transparent shell of empathy  
Fluorescent hell I found you in  
Some ticket out of ennui

We find ourselves in conflict  
I fought the answer in between  
You needed someone else's  
Accept what's there in front of me

Is this it? What is left?  
God has split us in half  
Is this it? Seconds left  
Will it fit? Could it fail?

Is this it? What is next?  
Could you care? Could you guess?  
Is this it? What is left?  
Do you care? Could you guess?  
Is this it? What is left?  
Could you care? Could you guess?  
Is this it?

Is this it? What is next?  
Will you care? Could you guess?  
Is this it? What is next?  
Could you care? Could you guess?  
Is this it?
