

## Time Will Stop

The Dollyrots

Never growing a day older on your shoulder lie my head  
Stare into the sky I wonder are we alive or are we dead  
Frozen we're suspended and the World is black and white  
We're the only one's in color just like moths drawn to the light  
t  
Now we're alone and there's only two Me and you You and me  
Searching for some things that we'll never find Never find Never  
r see Collide with me Two turning into one  
We will save time in a bottle  
Seal it up and time will stop  
For us

Not one minute but this one wrapped up in arms of glowing light  
Snap a picture for our lockets that will keep us safe and tight  
Pretend it's the future 50 something years ahead  
We will run into the ocean as the sun sets hand in hand  
Not one minute but this one  
Floating and weaving and  
Bobbing and turning  
A train to nowhere that takes us to somewhere  
Turn Back I'm right there  
Sticking so tightly  
Right where you found me
