

Clap

The-Dream

Out of sight, out of mind
Hard to touch, hard to find
You made me run, you made me hide
Though our love is blind
It's all so clear
That space comes from time
And that time is here
There's no better way
To say I need a break

I wish I could clap you on, clap you off
I'll make you say what I wanna hear
I wish I could clap you on, clap you off
Hold you close when I want you near {when I want you near}
There's only so much that I can take
Before I have to go away
And clap you on and clap you off

Oh, this rope is kinda tight
Loosen up, we're coming to a red light
It's not a dream, it's real life
When are you gonna realize
It's all so clear
That space comes from time
And that time is here
There's no better way
To say I need a break

It's not like I wanna {not like I wanna}
Be separated {be separated}
If that thought has ever crossed
{If that thought has ever crossed} my mind
{my mind} If you wanna know
I'm not going no where {where}
I just need to relax and unwind

I wish I could clap you on, clap you off
I'll make you say what I wanna hear
I wish I could clap you on, clap you off
Hold you close when I want you near {I want you near}
There's only so much that I can take
Before I have to go away
And clap you on and clap you off

I wish I could clap you on, clap you off
I'll make you say what I wanna hear
I wish I could clap you on, clap you off
Hold you close when I want you near {when I want you near}
There's only so much that I can take
Before I have to go away
And clap you on and clap you off

What is it with you?
I need you to love me
Not here to bug me
I want you to love me
And if you want that

I'll shut the door
Won't let you in
You're not getting no more
My sunshine, I've heard it all before
I thought you outta know

I wish I could clap you on, clap you off
I'll make you say what I wanna hear
I wish I could clap you on, clap you off
Hold you close when I want you near
There's only so much that I can take
Before I have to go away
And clap you on and clap you off

I wish I could clap you on, clap you off
I'll make you say what I wanna hear
I wish I could clap you on, clap you off
Hold you close when I want you near
There's only so much that I can take
Before I have to go away
And clap you on and clap you off

I wish I could clap you on, clap you off
I'll make you say what I wanna hear
