

# Feel Alive

The Dreggs

Step one, come away with me  
We'll find some place we're meant to be  
Where the grass is green and it's on the other side

Step two, I can make a story  
I promise that it won't be boring  
I'll pack our things and head so far away

I've been waiting for a long time  
To feel alive  
So take my hands  
Our problems will subside

Step three, pedal to the floor  
Our winds and rains will stay on course  
To find out what it means to run away

Step four, I can give you more  
Than life can give you open doors  
I'll grant your wish  
And show you sunny days

I've been waiting for a long time  
To feel alive  
So take my hands  
Our problems will subside

I've been waiting watching for  
The opportunity to take more  
More from life

I've been sitting writing this song  
For you to take my hand sing along  
Tonight

So now we wrote the book  
We traveled far and had a look  
And everything we said when we were young

So far we've come to know  
What it takes for us to grow  
We need to settle down and take it slow

I've been waiting for a long time  
To feel alive  
So take my hand  
Our problems will subside

I've been waiting watching for  
The opportunity to take more  
More from life

I've been sitting writing this song  
For you to take my hand sing along  
Tonight
