

# Leave It All Behind

The Dreggs

I've been chasing a feeling  
Just to see a different point of view  
Take me where my heart can go  
It's something that I can't believe in  
I've been running through waterfalls  
And I tried so hard to no avail  
Empty rooms and blank spaces  
Promises I don't believe in

I know I'll go where we will find  
Some place where we can leave it all behind  
It's dark out here, we'll find the light  
I'll help you find the light

You've been changing the meaning  
Just to feel something kind of new  
Take you where your heart can go  
Into something that I can't begin with  
You've been running through waterfalls  
Trying not to chase your tail  
Lonely roads and false statements  
Empty truth can be deceiving

I know I'll go where we will find  
Some place where we can leave it all behind  
It's dark out here, we'll find the light  
I'll help you find the light

I'll help you find the light

I know I'll go where we will find  
Some place where we can leave it all behind  
It's dark out here, we'll find the light  
I'll help you find the light  
I know I'll go where we will find  
Some place where we can leave it all behind  
It's dark out here, we'll find the light  
I'll help you find the light
