

Not Your Enemy

The Dykeenes

It's 2 AM you're asleep
Right with me back next to me
Feel the heat in room making it hard to breathe
You feel the cold here and have a smoke then
You take a deep breath and breathe it all in

It's in your eyes at least through your mind
You know more than I know when you try not to try
You move along stealing my fears
By making me feel I'm the best in years

My nights on fire
And I'm counting down the days
Till I shoot you down
You're a liar
And there's not a friend of yours left in this town

You've got your alcohol
You've got it all switched on
Let the cold fill room and airing you down
You have a smoke when you see it turning
Your body's aching
You feel it burning

It's in your eyes at least through your mind
You know more than I know when you try not to try
You move along stealing my fears
By making me feel I'm the best in years

My nights on fire
And I'm counting down the days
Till I shoot you down
You're a liar
And there's not a friend of yours left in this town

I'm not your enemy [x7]

Leave me alone, gotta leave me alone, you gotta [x9]

My nights on fire
And I'm counting down the days
Till I shoot you down
You're a liar
And there's not a friend of yours left in this town

I'm not your enemy [x7]
