Take Time and Find

The Early November

It's a rainy night So take this down to get it right The drops hit cold and hard But around the noise we're good

You're on your way, you're going strong As for now we're just along You're on your way, you're big, you're strong As for me I hope I'm wrong

It's so loud it hurts sometimes
It's getting faster every night
I'd like to single out
Every smack against my head

You're on your way, you're going strong As for now we're just along You're on your way, you're big, you're strong As for me I hope I'm wrong

It's coming out I wait for this for my enjoyment

Never let go All the things you say to me But when you have to go For everything you'll have to be I'll never let go To all the things you say I will not go I will not go

You're on your way, you're going strong As for now we're just along You're on your way, you're big, you're strong As for me I hope I'm wrong
