

Well Make It Together

The Easybeats

Nobody wants you when you're down and out
The street is your home
Acquaintances of old walk on by
With faces like stone

Give me a song to sing
Woman, you're everything
We'll make it, we'll make it together

You see me standing where I was, didn't care
It made you seem blind
And everything I had fell away
But I've still got my pride

Give me a song to sing
Woman, you're everything
We'll make it, we'll make it together

Give me a song to sing
Woman, you're everything
We'll make it, we'll make it together
