

Let's Go!

The Echoing Green

You're just in time
so step right up to the starting line
we smile and all the while
you'll walk this mile in single file

March like a soldier
left foot first and right down the middle
We'll give the order

If you can make it
we can break it and
take it away!!

we're never gonna give our youth away
it's not political
everybody wants to give us words to say
it's just so typical...

watch your mouth
when you're talking to me
scrape your knees in disloyalty
genuflect my audacity
as I step on all your decency.

We'll sit and watch you
(I told you so)
hold fast to virtue
(I sold your soul)
integrate or antique

If you can turn it
we can burn it and
take it away!!

Let's go!

we're never gonna give our youth away
it's not political
everybody wants to give us words to say
it's just so typical...

Let's go!
