

## Magic

## The Enemy

I'll stand by you, right by your side  
I'll walk down any road you find

If your nights are cold  
Then I'll light a fire  
And if your days are dark  
Then I'll shine a light  
Never let it go

You got the magic (magic)  
Running through your veins  
You got the magic (magic)  
Running through your veins

I'll hold your hand, tell you it's alright  
I'll wait until the end of time

If your nights are cold  
Then I'll light our fire  
If your days are dark  
Then I'll shine a light  
Never let it go

You got the magic (magic)  
Running through your veins  
You got the magic (magic)  
Running through your veins

You got the magic  
You got the magic  
You got the magic  
So let, let, let, let, let it go  
You got the magic  
Running through your veins  
You got the magic  
Running through your veins  
You got the magic  
Running through your veins  
You got the magic  
Running through your veins  
You got the magic  
Running through your veins  
You got the magic  
Running through your veins
