

This Day

The Epoxies

I think I know you so glad to meet you
I need to see you I wanna spit right in your face
You think you're sex or ?
I know you're nothing when the guilt trip's off your face
And if you and I are smart we'll never meet again

I know this feeling it bleeds my insides
I wanna fight and fucking bury them alive
I am your nun I've been a good girl
So now you'll kill the pass just to make it out alive
If I am smart I will never hear from you

This day I'm better alone
This week I'm on my own
This month I will get by
This year will never die

When will this leave me? When is it over?
? every time I breathe
I'm going down it's coming inside
The sweat and lust in here that I will always see
And if you and she are smart we'll never meet again

I've been a good girl I've been a weak girl
Her fates will follow with the day I clear my head
I will not break I will not listen
I will be happy when the visions are dead
And if you are smart you will begin again
